EDUCATION

Purdue University, West Lafayette, Indiana	May 2018
Bachelor of Science: Building Information Modeling, Virtual Product Integration, and Computer Graphics Technology	GPA: 3.81/4.00
Dean's List	All Semesters

SUMMARY

BIM content creator searching for a company that will offer new learning experiences and the opportunity to grow together.

SOFTWARE PROFICIECNIES

Revit, AutoCAD, Adobe Photoshop, Enscape, Microsoft Office, Webex, Teams

SKILLSET

- Developing models – Built parametric Revit families with an emphasis towards simplicity for end users and reusability
- Modeling projects – Handled the majority of renderings for the company's most complex buildings
- Going the extra mile – Used Photoshop to create textures to match the exact materials the client wanted
- Adapting to new programs – Learned Enscape to create renderings; updated materials to suit the program's engine
- Mentoring colleagues – Taught coworkers basics about Revit, designed training guides, and offered support and troubleshooting after formal training

WORK EXPERIENCE

BIM Application Specialist	May 2018 – Current
Morton Buildings	Morton, Illinois
<ul style="list-style-type: none">• Created robust parametric family models (doors, windows, trusses etc.) to be used in future buildings• Tested Revit families in projects to verify functionality, and redesigned or modified them over time in response to changing information• Modeled and rendered buildings (exterior and interior) for clients based on preliminary plans and written information• Communicated directly with sales consultants and project managers about project information and deadlines• Collaborated with the marketing and IT departments to create new content for advertising and safety site images for an internal company app	
Engineering Operations Intern	June 2017 – May 2018
Morton Buildings	
<ul style="list-style-type: none">• Encouraged introduction of Revit into company workflow via demonstration of the software's capabilities• Built framework of a Revit content library for effective data management and retrieval
